		Tc-1			Action Bar Mechanics	Share button	To check the visibility of "Action Bar Mechanics" page.		API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on action bar mechanics	"Action Bar Mechanics page" should be displayed after clicking.	"Action Bar Mechanics page "is displayed	Pass	N/A
		Tc-2				Customize and control option								
		Tc-3			Action Bar Navigation	New in-task activity	To check the visibility of "Action Bar Navigation" page.		API demo app should be installed.	1. Open API demo app 2. click on app 3.click on action bar 4.click on action bar navigation	"Action Bar Navigation page" should be displayed after clicking.	"Action Bar Navigation page" is displayed	Pass	N/A
		Tc-4				action bar navigation								
		Tc-5			Action Bar Tabs	add new tab	To check the visibility of "Action Bar Tabs" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on action bar tabs	"Action Bar Tabs page" should be displayed after clicking.	"Action Bar Tabs page "is displayed		N/A
		Tc-6				remove last tab							Pass	
		Tc-7		Action Bar		toggle tab mood								N/A
		Tc-8				remove all tabs								
		Tc-9			Action Bar Usage	action bar usage	To check the visibility of "Action Bar Usage" page.		API demo app should be installed.	1.Open API demo app 2. click on app 3. click on action bar 4.click on action bar usage	"Action Bar Usage page" should be displayed after clicking.	"Action Bar Usage page " is displayed	Pass	N/A
		Tc-10			Action Provider	Share action provider	To check the visibility of "Action Provider" page.			1. Open API demo app 2. click on app 3. click on action bar 4.click on action provider	"Action Provider page "should be displayed after clicking.	"Action Provider page"is displayed	Pass	
		Tc-11			Display Options	-	To check the visibility of "Display Options" page.		API demo app should be installed.	1.Open API demo app 2. click on app 3. click on action bar 4.click on display options	"Display Options page" should be displayed after clicking.	"Display Options page" is displayed	Pass	N/A
		Tc-12			Animation	fade in zoom in modern fade in modern zoom in scale up thumbnail zoom	To check the visibility of "Animation" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on activity 4.click on animation	"buttons"should be displayed after open the animation page	"buttons"is displayed	Pass	
		Tc-13			Custom Dialog	-	To check the visibility of "Custom Dialog" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Custom Dialog	"popup"should be displayed after clicking the Custom Dialog	"popup"is displayed	Pass	N/A
		Tc-14			Custom Title	left is best right is always right	To check the visibility of "Custom Title" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Custom Title	"Custom Title page"should be displayed after clicking.	"Custom Title page"is displayed	Pass	
		Tc-15			Dialog	-	To check the visibility of "Dialog" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on dialog	"popup"should be displayed after clicking the Dialog	"popup"is displayed	Pass	N/A
		Tc-16			Finish Affinity	next Some more Finish!	To check the visibility of "Finish Affinity" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Finish Affinity	"Finish Affinity page"should be displayed after clicking.	"Finish Affinity page"is displayed	Pass	
		Tc-17			Forwarding	-	To check the visibility of "Forwarding" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on activity 4.click on Forwarding	"Forward page"should be displayed after clicking.	"Forward page"is displayed	Pass	N/A
		Tc-18			Hello World	-	To check the visibility of "Hello World" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on animation	"Hello World page"should be displayed after clicking.	"Hello World page is displayed	Pass	
		Tc-19			Intent Activity Flags	Flag_Activity_Clear_task Flag_Activity_Clear_task (pi)	To check the visibility of "Intent Activity Flags" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on intent Activity Flags	"Intent Activity Flags page" should be displayed after clicking.	"Intent Activity Flags page"is displayed	Pass	N/A

			Tc ID		Feature	Sub	Description	Type	Precondition	Steps	Expected Result	Actual Result	Status	Remarks
														N/A
			Tc-20		Intents	Get Music	To check the visibility of "Intents" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Intents	"Intent Flags page"should be displayed after clicking.	"Intent Flags page"is displayed	Pass	
			Tc-21		Persistent State	Initial Test	To check the visibility of "Persistent State" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Persistent State	"Presistet Statepage"should be displayed after clicking.	"Persistent State page" is displayed	Pass	N/A
			Tc-22		Presentation	Check box	To check the visibility of "Presentation" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Presentation	"Presentation page"should be displayed after clicking.	"Presentation page"is displayed	Pass	
			Tc-23		Presentation with Media Router	-	To check the visibility of "Presentation with Media Router" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on Presentation with Media Router	"Presentation with Media Router page"should be displayed after clicking.	"Presentation with Media Router page"is displayed	Pass	N/A
		Activity	Tc-24		Quick Contacts Demo	-	To check the visibility of "Quick Contacts Demo" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on Quick Contacts Demo	"Quick Contacts Demo page"should be displayed after clicking.	"Quick Contacts Demo page"is displayed	Pass	
			Tc-25		Receive Result	Get Result	To check the visibility of "Receive Result" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Receive Result	"Receive Result page" should be displayed after clicking.	"Receive Result page"is displayed	Pass	N/A
			Tc-26		Recreate	Recreate	To check the visibility of "Recreate" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Recreat	"Recreate page"should be displayed after clicking.	"Recreate page"is displayed	Pass	
			Tc-27		Redirection	go	To check the visibility of "Redirection" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Redirection	"Redirection page"should be displayed after clicking.	"Redirection page"is displayed	Pass	N/A
			Tc-28		Reorder Activities	go to the Second	To check the visibility of "Reorder Activities" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Reorder Activities	"Reorder Activities page" should be displayed after clicking.	"Reorder Activities page"is displayed	Pass	
			Tc-29		Save & Restore State	Initial Text	To check the visibility of "Save & Restore State" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Save & Restore State	"Save & Restore State page"should be displayed after clicking.	"Save & Restore State page"is displayed	Pass	N/A
			Tc-30		Screen Orientation	Drop Down	To check the visibility of "Screen Orientation" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on Screen Orientation	"Screen Orientation page" should be displayed after clicking.	"Screen Orientation page"is displayed	Pass	
			Tc-31		Secure Surfaces	Secured Dialog Secure Surface View Secure Window	To check the visibility of "Secure Surfaces" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on Secure Surfaces	"Secure Surfaces page" should be displayed after clicking.	"Secure Surfaces page" is displayed	Pass	N/A
			Tc-32		SetWallpaper	Randomise Set WallPaper	To check the visibility of "SetWallpaper" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on SetWallpaper	"SetWallpaper page"should be displayed after clicking.	"SetWallpaper page"is displayed	Pass	
			Tc-33		Soft Input Modes	-	To check the visibility of "Soft Input Modes" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on action bar 4.click on Soft Input Modes	"Soft Input Mode page" should be displayed after clicking.	"Soft Input Modes page" is displayed	Pass	N/A
			Tc-34		Translucent	-	To check the visibility of "Translucent" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on activity 4.click on Translucent	"Translucent page"should be displayed after clicking.	"Translucent Modes page"is displayed	Pass	
			Tc-35		Translucent Blur	-	To check the visibility of "Translucent Blur" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Translucent Blur	"Translucent Blur page" should be displayed after clicking.	"Translucent Blur Modes page"is displayed	Pass	
			Tc-36		Wallpaper	-	To check the visibility of "Wallpaper" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on activity 4.click on Wallpaper	"Wallpaper page"should be displayed after clicking.	"Wallpaper page"is displayed	Pass	N/A

		Tc-37			One Shot Alarm		To check the visibility of "Alarm Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on alarm 4.click on Alarm Controller	"Alarm Controller page" should be displayed after clicking.	"Alarm Controller" is displayed	Pass	N/A
		Tc-38		Alarm Controller	Start Repeating Alarm	UI/UX						
		Tc-39			Stop Repeating Alarm			UI/UX	API demo app should be installed.				Pass	
		Tc-40	Alarm		Start Alarm Service		To check the visibility of "Alarm Service" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on alarm 4.click on Alarm Service	"Alarm Service page" should be displayed after clicking.	"Alarm Service page" is displayed	Pass	N/A
		Tc-41		Alarm Service	Stop Alarm Service			UI/UX	API demo app should be installed.				Pass	N/A
		Tc-42	Alert Dialogs	-	-	To check the visibility of "Alert Dialogs" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3.click on Alert Dialogs	"Alert Dialogs page" should be displayed after clicking.	"Alert Dialogs page" is displayed	Pass	
		Tc-43		General	-	To check the visibility of "General " page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Device Admin 4.click on General	"General page" should be displayed after clicking.	"General page" is displayed	Pass	N/A
		Tc-44		Password quality		To check the visibility of "Password quality" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Device Admin 4.click on Password quality	"Password quality page" should be displayed after clicking.	"Password quality page" is displayed	Pass	
		Tc-45	Device Admin	Password expiration		To check the visibility of "Password quality" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Device Admin 4.click on Password expiration	"Password expiration page" should be displayed after clicking.	"Password expiration page" is displayed	Pass	N/A
		Tc-46		Lock screen/Wipe	-	To check the visibility of "Lock screen/Wipe" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Device Admin 4.click on Lock screen/Wipe	"Lock screen/Wipe page" should be displayed after clicking.	"Lock screen/Wipe page" is displayed	Pass	
		Tc-47		Encryption		To check the visibility of "Encryption" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Device Admin	"Encryption" should be displayed after clicking.	"Encryption page" is displayed	Pass	N/A
		Tc-48		Alert Dialog		To check the visibility of "Alert Dialog" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Alert Dialog	"Alert Dialog page" should be displayed after clicking.	"Alert Dialog page" is displayed	Pass	
		Tc-49		Arguments		To check the visibility of "Arguments" page.	UI/UX	API demo app should be installed.	1. Open on API demo app 2. click on app 3. click on Fragment 4.click on Arguments	"Arguments" should be displayed after clicking.	"Arguments page" is displayed	Pass	N/A
		Tc-50		Context Menu	-	To check the visibility of "Context Menu" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Context Menu	"Context Menu" should be displayed after clicking.	"Context Menu page" is displayed	Pass	
	App	Tc-51		Custom Animations		To check the visibility of "Custom Animations" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Custom Animations	"Custom Animations" should be displayed after clicking.	"Custom Animations page" is displayed	Pass	N/A
		Tc-52		Dialog		To check the visibility of "Dialog" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Dialog	"Dialog page" should be displayed after clicking.	"Dialog page" is displayed	Pass	
		Tc-53		Dialog or Activity	-	To check the visibility of "Dialog or Activity" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Dialog	"Dialog page" should be displayed after clicking.	"Encryption page" is displayed	Pass	N/A
		Tc-54		Hide and show		To check the visibility of "Hide and show" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Hide and show	"Hide and show page" should be displayed after clicking.	"Hide and show page" is displayed	Pass	

		Tc-55	Fragment	Layout		To check the visibility of "Layout" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Layout	"Layout page"should be displayed after clicking.	"Layout page"is displayed	Pass
		Tc-56		List Array		To check the visibility of "List Array" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on List Array	"List Array page"should be displayed after clicking.	"List Array page"is displayed	Pass
		Tc-57		Menu		To check the visibility of "Menu" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Menu	"Menu page"should be displayed after clicking.	"Menu page"is displayed	Pass
		Tc-58		Nesting Tabs	-	To check the visibility of "Nesting Tabs" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Nesting Tabs	"Nesting Tabs page"should be displayed after clicking.	"Nesting Tabs page"is displayed	Pass
		Tc-59		Receive Result		To check the visibility of "Receive Result" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Receive Result	"Receive Result page" should be displayed after clicking.	"Receive Result page"is displayed	Pass
		Tc-60		Retain Instance		To check the visibility of "Retain Instance" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Fragment 4.click on Retain Instance	"Retain Instance page" should be displayed after clicking.	"Retain Instance page"is displayed	Pass
		Tc-61		Stack	-	To check the visibility of "Stack" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Fragment 4.click on Stack	"Stack page"should be displayed after clicking.	"Stack page"is displayed	Pass
		Tc-62		Tabs		To check the visibility of "Tabs" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Fragment 4.click on Stack Tabs	"Tabs page"should be displayed after clicking.	"Tabs page"is displayed	Pass
		Tc-63	Job	Job Work Service Controller	-	To check the visibility of "Job Work Service Controller" page.	UI/UX	API demo app should be installed.	1. Open on API demo app 2. click on app 3. click on Job 4.click on Job Work Service Controller	"Job Work Service Controller"should be displayed after clicking.	"Job Work Service Controller page"is displayed	Pass
		Tc-64	Launcher Shortcuts	-		To check the visibility of "Launcher Shortcuts" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Launcher Shortcuts	"Launcher Shortcuts page" should be displayed after clicking.	"Launcher Shortcuts Page"is displayed	Pass
		Tc-65		Cursor		To check the visibility of "Cursor" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Loader 4.click on Cursor	"Cursor page"should be displayed after clicking.	"Cursor page"is displayed	Pass
		Tc-66	Loader	Custom	-	To check the visibility of "Custom" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Loader 4.click on Custom	"Custom page"should be displayed after clicking.	"Custom page"is displayed	Pass
		Tc-67		Retained		To check the visibility of "Retained" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Loader 4.click on Retained	"Retained page"should be displayed after clicking.	"Retained page"is displayed	Pass
		Tc-68		Throttle		To check the visibility of "Throttle" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Loader 4.click on Cursor Throttle	"Throttle page"should be displayed after clicking.	"Throttle page"is displayed	Pass
		Tc-69	Menu	Inflate from XML	-	To check the visibility of "Inflate from XML" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Menu 4.click on Inflate from XML	"Inflate from XML page" should be displayed after clicking.	"Inflate from XML page" is displayed	Pass
		Tc-70		Background Service	Post Notification	To check the visibility of "Background Service" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Background Service	"Background Service"should be displayed after clicking.	"Background Service"is displayed	Pass
		Tc-71		IncomingMessage	-	To check the visibility of "IncomingMessage"	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Show App Notification	"Show App Notification page"should be displayed after clicking.	"Show App Notification page"is displayed	Pass

N/A (repeated in rightmost column across grouped rows)

			IncomingMessage	-	"IncomingMessage" page.							N/A
		Tc-72				UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Show Interstitial Notification	"Show Interstitial Notification page"should be displayed after clicking.	"Show Interstitial Notification page"is displayed	Pass	
		Tc-73	Notifying Service Controller	Start Service	To check the visibility of "Notifying Service Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Start Service	"Start Service page"should be displayed after clicking.	"Start Service page"is displayed	Pass	N/A
		Tc-74		Stop Service		UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Stop Service	"Stop Service page"should be displayed after clicking.	"Stop Service page"is displayed	Pass	
	Notification	Tc-75	Notify With Text	Show Short Notification	To check the visibility of "Notify With Text" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Notification 4.click on Show Short Notification	"Show Short Notification page"should be displayed after clicking.	"Show Short Notification page"is displayed	Pass	N/A
		Tc-76		Show Long Notification		UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Notification 4.click on Show Long Notification	"Show Long Notification Page"should be displayed after clicking.	"Show Long Notification page"is displayed	Pass	
		Tc-77	Status Bar	Icons only	To check the visibility of "Status Bar" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Status Bar 4.click on Icons only	"Icons only page"should be displayed after clicking.	"Icons only page"is displayed	Pass	N/A
		Tc-78		Icons and marquee		UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Status Bar 4.click on Icons and marquee	"Icons and marquee page" should be displayed after clicking.	"Icons and marquee page"is displayed	Pass	
		Tc-79		Use remote views in balloon		UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Status Bar 4.click on Use remote views in balloon	"Use remote views in balloon page"should be displayed after clicking.	"Use remote views in balloon page"is displayed	Pass	N/A
		Tc-80		Use default values where applicable		UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Status Bar 4.click on Use default values where applicable	"Use default values where applicable page"should be displayed after clicking.	"Use default values where applicable page" is displayed	Pass	
		Tc-81		Clear Notification		UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Status Bar 4.click on Clear Notification	"Clear Notification page" should be displayed after clicking.	"Clear Notification page" is displayed	Pass	N/A
		Tc-82	Print	Print Bitmap	To check the visibility of "Print Bitmap" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Print 4.click on Print Bitmap	"Print Bitmap page"should be displayed after clicking.	"Print Bitmap page"is displayed	Pass	
		Tc-83		Print Custom Layout	To check the visibility of "Print Custom Layout" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Print 4.click on Print Custom Layout	"Print Custom Layout page" should be displayed after clicking.	"Print Custom Layout page"is displayed	Pass	N/A
		Tc-84		Print HTML from screen	To check the visibility of "Print HTML from screen" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Print 4.click on Print HTML from screen	"Print HTML from screen page"should be displayed after clicking.	"Print HTML from screen page"is displayed	Pass	
		Tc-85		Print HTML off screen	To check the visibility of "Print HTML off screen" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Print 4.click on Print HTML off screen	"Print HTML off screen page"should be displayed after clicking.	"Print HTML off screen page"is displayed	Pass	N/A
		Tc-86	Search	Invoke Search	To check the visibility of "Invoke Search" page.	UI/UX	API demo app should be installed.	1.Open API demo app 2. click on app 3. click on Search 4.click on Invoke Search	"Invoke Search page"should be displayed after clicking.	"Invoke Search page"is displayed	Pass	
		Tc-87		Query Search Results	To check the visibility of "Query Search Results" page.	UI/UX	API demo app should be installed.	1. Open demo app 2. click on app 3. click on Search 4.click on Query Search Results	"Query Search Results page"should be displayed after clicking.	"Query Search Results Page"is displayed	Pass	N/A

		Tc	Module	Feature	Sub-item	Description	Type	Precondition	Steps	Expected Result	Actual Result	Status	
													N/A
		Tc-88		Foreground Service Controller		To check the visibility of "Foreground Service Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Foreground Service Controller	"Fareground Service Controller page"should be displayed after clicking.	"Fareground Service Controller page"is displayed	Pass	
		Tc-89		Isolated Service Controller		To check the visibility of "Isolated Service Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Isolated Service Controller	"Isolated Service Controller page"should be displayed after clicking.	"Isolated Service Controller page"is displayed	Pass	N/A
		Tc-90		Local Service Binding		To check the visibility of "Local Service Binding" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Local Service Binding	"Local Service Binding page"should be displayed after clicking.	"Local Service Binding page"is displayed	Pass	
		Tc-91		Local Service Controller		To check the visibility of "Local Service Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Local Service Controller	"Local Service Controller page"should be displayed after clicking.	"Local Service Controller page"is displayed	Pass	N/A
		Tc-92	Service	Messenger Service		To check the visibility of "Messenger Service" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Messenger Service	"Messenger Service page" should be displayed after clicking.	"Messenger Service page"is displayed	Pass	
		Tc-93		Remote Service Binding		To check the visibility of "Remote Service Binding" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Remote Service Binding	"Remote Service Binding page"should be displayed after clicking.	"Remote Service Binding page"is displayed	Pass	N/A
		Tc-94		Remote Service Binding Options		To check the visibility of "Remote Service Binding Options" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Remote Service Binding Options	"Remote Service Binding Options page"should be displayed after clicking.	"Remote Service Binding Options page"is displayed	Pass	
		Tc-95		Remote Service Controller		To check the visibility of "Remote Service Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Invoke Search	"Remote Service Binding Options page"should be displayed after clicking.	"Remote Service Binding Options page"is displayed	Pass	N/A
		Tc-96		Service Start Arguments Controller		To check the visibility of "Service Start Arguments Controller" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Service 4.click on Service Start Arguments Controller	"Service Start Arguments Controller page"should be displayed after clicking.	"Service Start Arguments Controller page"is displayed	Pass	
		Tc-97	Text-To-Speech	Again		To check the visibility of "Again" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Text-To-Speech 4.click on Again	"Again page"should be displayed after clicking.	"Again page"is displayed	Pass	N/A
		Tc-98	Voice Recognition	-		To check the visibility of "Voice Recognition" page.	UI/UX	API demo app should be installed.	1. Open API demo app 2. click on app 3. click on Voice Recognition	"Voice Recognition page" should be displayed after clicking.	"Voice Recognition page"is displayed	Pass
